How to Pair Remote Control (RC) with a different Digibox brand.

In case you've been issued a new Digibox brand, you will need to pair your old remote control (RC) with your new Digibox. Here's how:

1 Press 🟢 + (OK) until the LED light on the RC (Power Button) blinks twice.

2 Enter [982]. The LED light on the RC (Power Button) should blink four times to confirm if the Digibox codeset is unlocked and can be changed.

If the LED blinks only twice, repeat step 1.

3 Press 🟢 + (OK) until the LED blinks twice then enter the corresponding **Digibox code**, found on the next page.
